

#1, and no wonder.

QubeVu's patented technology is so far ahead of anything else on the market, it's hard even compare it to other dimensioners. While everyone else is still bolting together belts and gears, our small-footprint, solid-state solutions blow right by them. It's no wonder QubeVu is the fastest growing brand of dimensioning equipment.

World's fastest dimensioning

QubeVu dimensions anything in 200 milliseconds. Lightning? The blink of an eye? QubeVu is faster. Contrast that with competitive devices that take seven seconds or longer. You'll ship more, pack more, save more.

Certified accuracy, any shape

Unlike other dimensioners, QubeVu handles cubes, tubes, polybags – any shape at all. Odd shapes are on track to make up a majority of the logistics stream; don't get stuck with equipment that can't handle the future!

Built-in image capture

As QubeVu grabs dimensions, it also takes a photo of every item, marked with size data and a timestamp – invaluable for verification, tracking and claim protection. Some models add support for barcode and OCR capture as well.

Meet the QubeVu family

The world's fastest dimensioning and certified accuracy on any shape, plus a photo of every item.

DimStation™

DimStation XL

Adds higher-resolution optics for barcode capture and OCR support.
